

2022 November AZ NCRS Technical Seminar

The November 2022 AZ NCRS Technical Seminar was held in Scottsdale at Cascio Motors and was well attended. Gary Craig, Judging Chairman, was a great presenter for a complex subject.

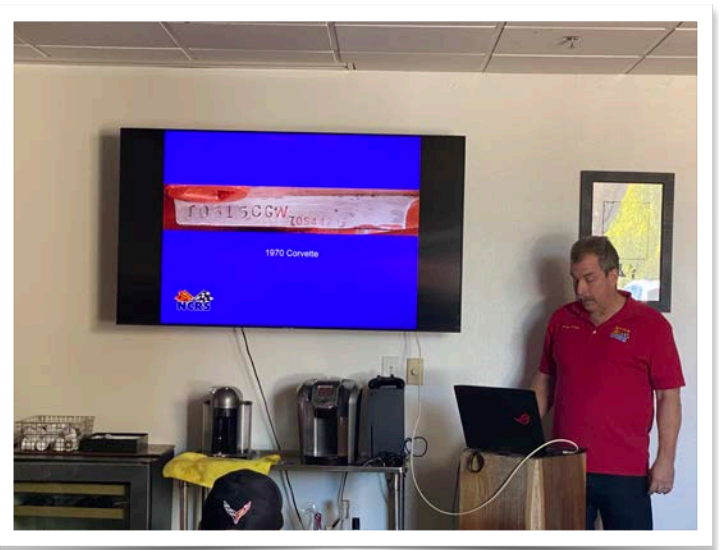

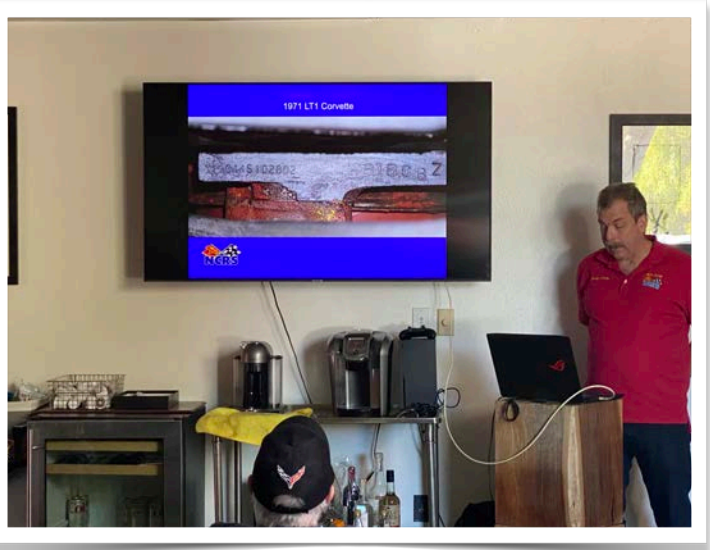

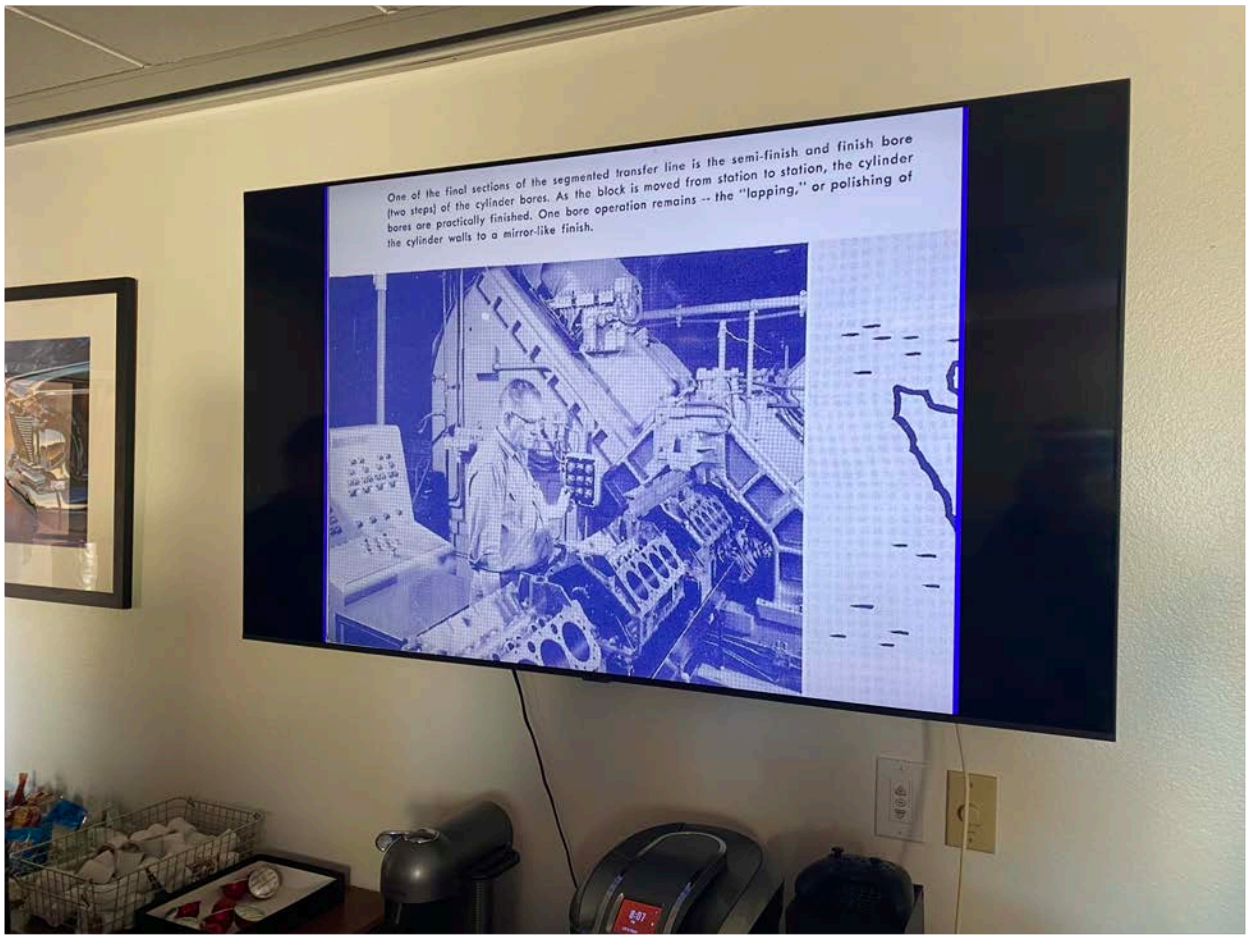

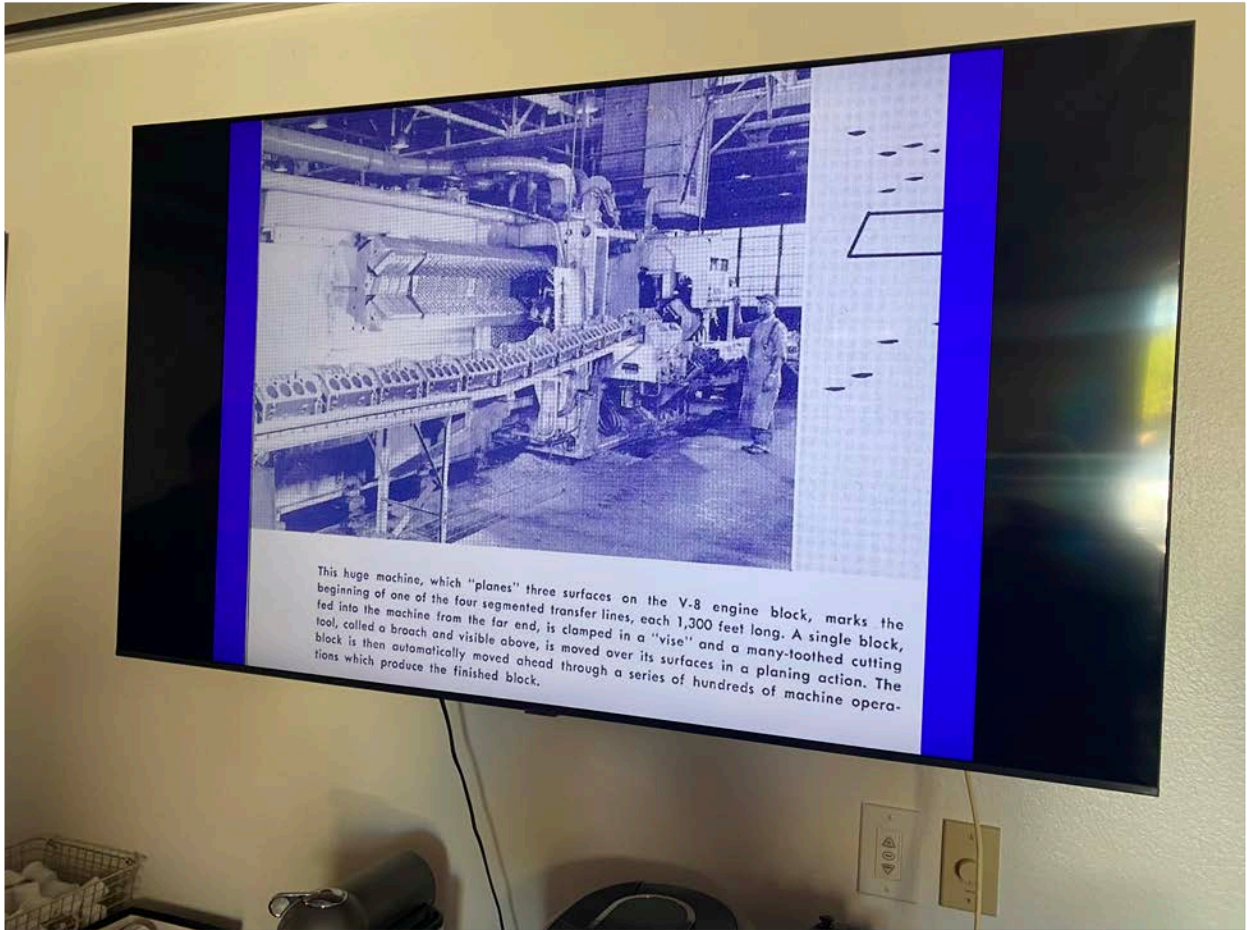

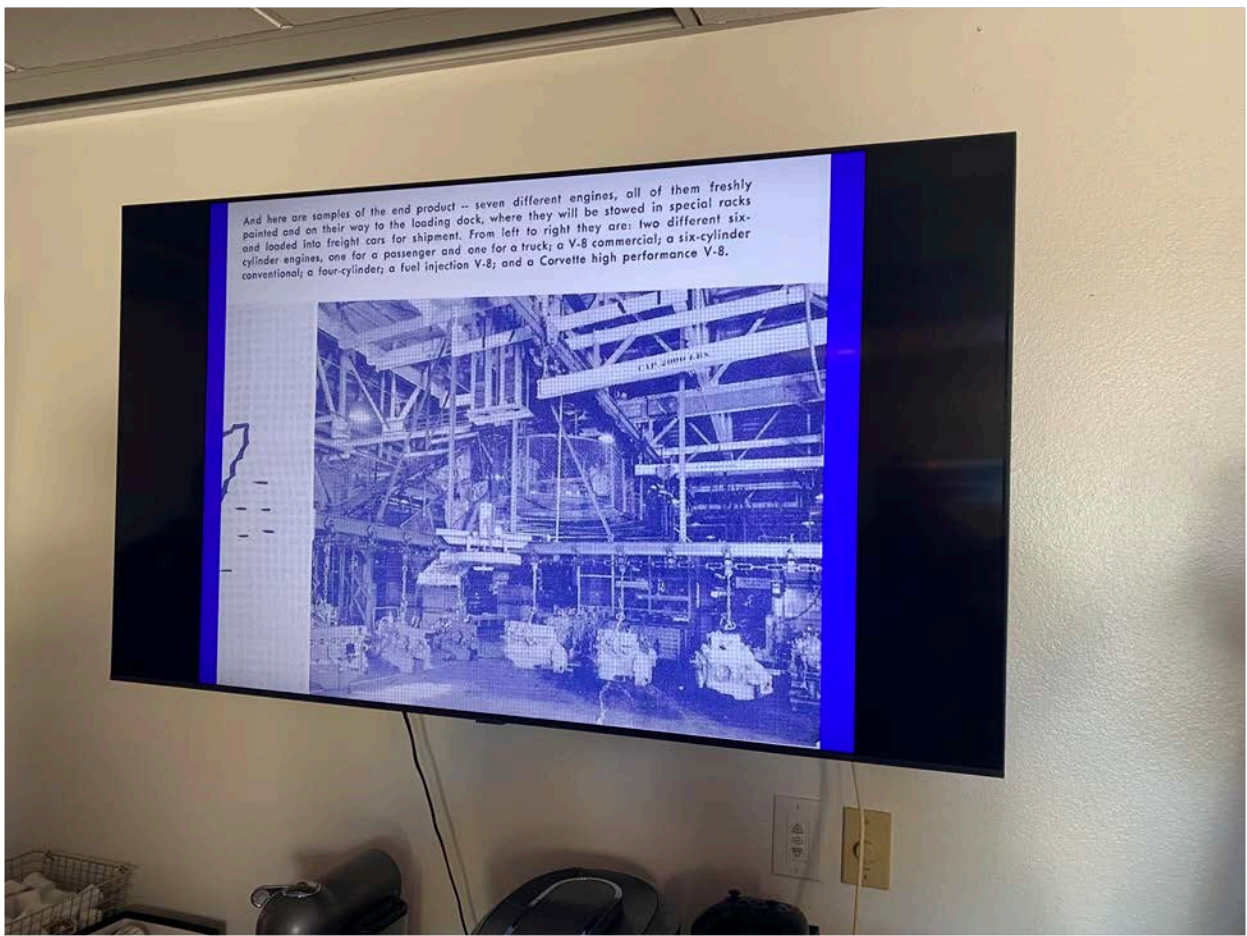

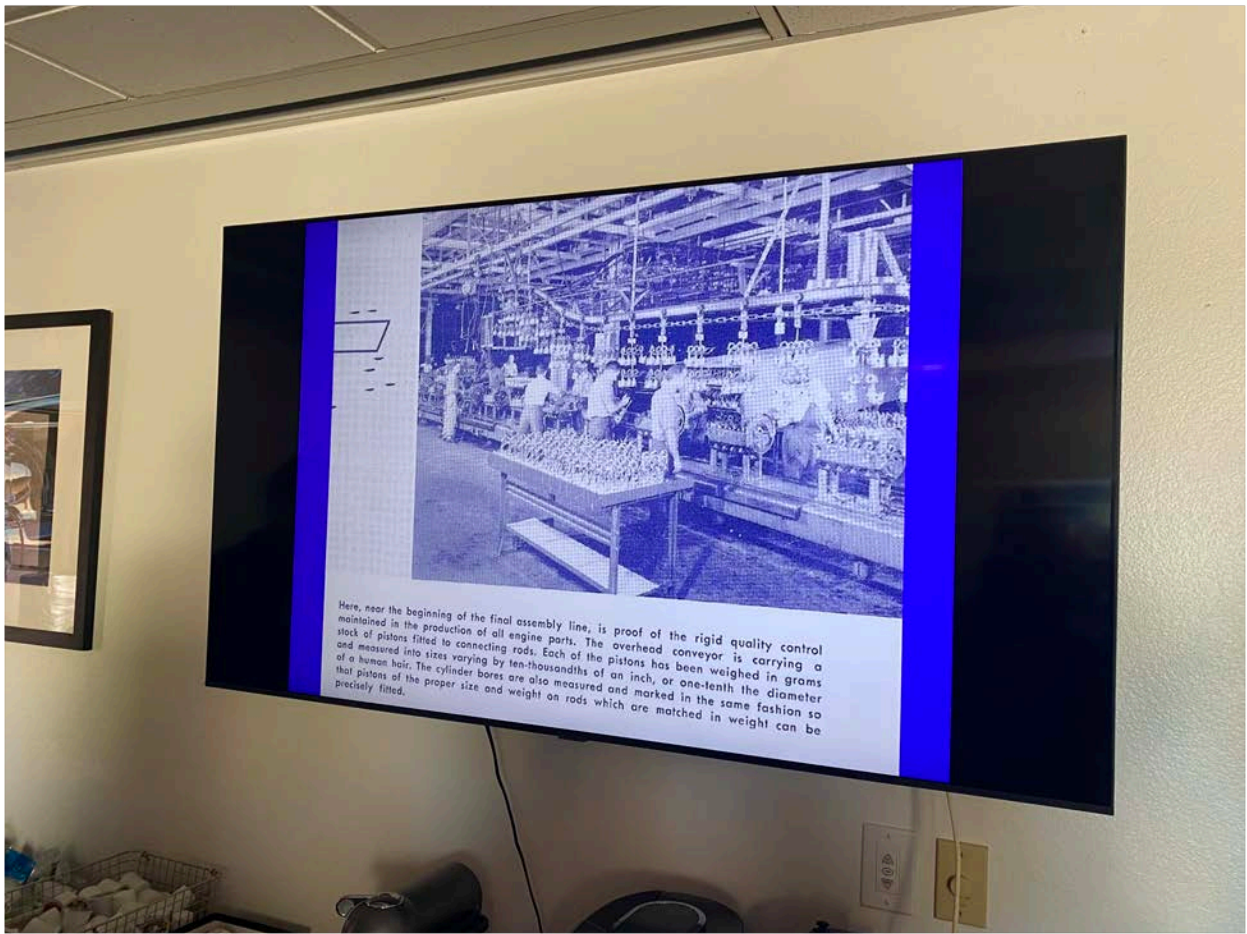

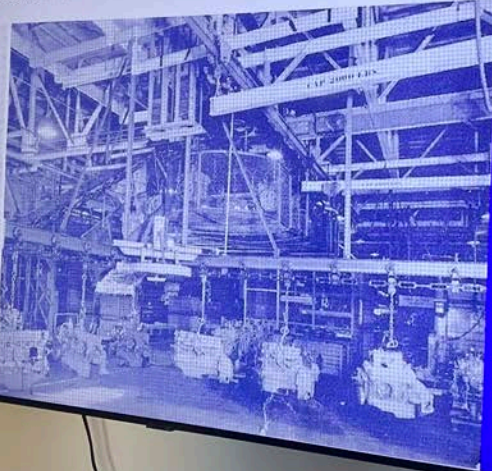

And here are samples of the end product -- seven different engines, all of them freshly painted and on their way to the loading dock, where they will be stowed in special racks and loaded into freight cars for shipment. From left to right they are: two different six-cylinder engines, one for a passenger and one for a truck; a V-8 commercial; a six-cylinder conventional; a four-cylinder; a fuel injection V-8; and a Corvette high performance V-8.

THANK YOU TO OUR MAGNIFICENT HOSTS!
